Chris Taylor

Senior Frontend Engineer • London • ctaylor.dev • linkedin.com/in/chris-taylor-b50703a7 • github.com/christaylor19 • christaylor94.dev@gmail.com

SUMMARY

Frontend engineer with over eight years building web products, from React apps to the server-driven services behind them. I'm an agentic engineer: I build with Claude Code agents, shared skills, design systems that agents follow, and checks that prove the result. I studied geography and GIS before I wrote code, and still make maps for fun.

EXPERIENCE

ClearScore • London

Apr 2023 – now

Senior Frontend Engineer (Jan 2025 – now) • Frontend Engineer (Apr 2023 – Jan 2025)

- **Marketplace Transformation:** work on the backend-for-frontend, the Node services that build server-driven UI for web and apps in the rebuilt credit marketplace. Top contributor to its codebase; spent two weeks in Sydney for the Australian rollout.
- **CS24:** seconded to Credit Health for the global redesign of the credit report, built on server-driven UI and an event-driven architecture on Kafka. Owned the Accounts section in every market through to launch in Nov 2024.
- **Growth:** ran A/B experiments across the web app and home feed, and worked on the shared React frontend platform.
- Build the Claude Code skills the team uses for investigating issues, testing and on-call. Review about as much code as I write.

Career break • Travelling in South America

Sep 2022 – Mar 2023

Perlego • London

Mar 2020 – Sep 2022

Senior Software Engineer (Jun 2021 – Sep 2022) • Software Engineer (Mar 2020 – Jun 2021)

- Led the Library squad: student-facing pages, search and microservices.
- Moved the web app to TypeScript, raised test coverage, and migrated to automated CI/CD.
- Created Perlego UI, a private component library for the web apps.

APAK Group • Newbury

Sep 2017 – Mar 2020

Software Developer

- First role in software: C# and JavaScript on a customer retention tool BMW used in markets worldwide.

PROJECTS

- **Almanac** (almanac.ctaylor.dev): a Wikipedia-style reference site for sports data, built with AI agents and a nightly data pipeline that checks itself.
- **HN Monthly Top:** the top Hacker News stories for any month, with AI summaries.
- **Maps:** NYC neighbourhoods, the Amtrak network and HS2 Phase One, at ctaylor.dev.

SKILLS

Agentic engineering: Claude Code, subagents, skills, hooks, MCP • TypeScript • React • Node (Fastify) • Kafka • Postgres • Playwright • Datadog

EDUCATION

MSc Geographic Information Science, University of Edinburgh, 2017 • BSc Human & Physical Geography (2:1), University of Reading, 2016, including an Erasmus semester in Bergen
